## Emergency Preparedness for Individuals with Paralysis

The Ability Center of Greater Toledo is offering emergency and disaster resources to individuals with paralysis. Our focus is on increasing the safety, security, and emergency preparedness of individuals with paralysis in their homes.

It is important that individuals living with paralysis in Northwest Ohio community have access to the most current resources in the event of a disaster. This includes the development of a comprehensive Individualized Emergency Preparedness Plan along with a Personal Emergency Kit (above). Participants will have the opportunity to attend informational sessions.

*Paralysis is a central nervous system disorder resulting in difficulty or inability to move the upper or lower extremities. Paralyzing conditions include stroke, spinal cord injury, multiple sclerosis, cerebral palsy and others.*
